

✚ Brief description of goods

Mixed animal feed in pellet form, consisting of crushed maize, wheat bran and soybean meal, presented in 500 kg flexible container bag.

Ingredient ratio: Maize (40%), wheat bran (30%) and soybean meal (30%)

Component : Crude protein (21.26%) and crude ash (3.75%)

Feature : Light brown cylindrical pellet

Application : Feed for cattle

✚ Classification

2309.90-298

✚ Reason for classification

The feed is manufactured by mixing maize, wheat bran, and soybean meal and by shaping the mixture into pale brown pellets. It is considered a preparation of the type for pellet animal feed. Therefore, it is classified as stated above.

**Note:**

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
