

✚ Brief description of goods

Supported catalyst with iridium as the active substance.

Component: Iridium (active substance) and alumina (carrier)

Shape: Granular

Application: For attitude control rocket engines of a satellite

✚ Classification

3815.12-220

✚ Reason for classification

Although iridium corresponds to the precious metals in Chapter 71, a supported catalyst is not classified in Chapter 71 according to the provisions of Note 3 (d) to Chapter 71. Therefore, it is classified as stated above.

**Note:**

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
