

**✚ Brief description of goods**

Plastic core for film winding

Material: ABS (Acrylonitrile butadiene styrene resin)

Feature: Cylindrical (O.D.: 162 mm, I.D.: 152 mm, length: 500 mm)

Application: A support to be used in transportation and manufacturing line of films

**✚ Classification**

3917.29-000

**✚ Reason for classification**

The good described above is a cylindrical plastic product to be used as a core to wind a film. It is classified as stated above since the shape of the core correspond to “tubes, pipes and hoses” prescribed in Note 8 to Chapter 39.

**Note:**

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
