

✚ Brief description of goods

Teflon endless belts to feed the manuscript of a copier, presented as a single item.

✚ Classification

3926.90-029

✚ Reason for classification

For a plastic transmission belt, even if solely or principally used with a particular kind of machine, Note 1 (a) to Section XVI is applied when it is presented as a single item, and it is classified according to its material.

Therefore, it is classified as stated above.

**Note:**

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
