

✿ Brief description of goods

Rubber hose reinforced with textile material.

Material: The inner layer made of a synthetic rubber (ethylene-propylene rubber), the outer layer is made of a natural rubber, and the reinforcing material is a nylon fiber.

Feature: A rubber hose reinforced by a stratification consisting of reticulated textile threads

Application: Hose for a pump

Size: (O.D.) 32 mm, (I.D.) 10 mm, (length) 510 mm

Other: The synthetic rubber is one that satisfies the provisions of Note 4 to Chapter 40.

✿ Classification

4009.31-200

✿ Reason for classification

The hose is classified as stated above as a rubber tube without joints reinforced with textile material.

Note that, although it is a hose for pump, it is not classified in Section XVI since it is covered more specifically in Section VII (Heading 40.09).

**Note:**

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
