

✚ Brief description of goods

Pouch (width 12.7 cm, height 7.6 cm, depth 2.5 cm) made of artificial fiber (polyester fiber) fabric. A plastic molded box is inserted in the pouch. There are hook-and-loop fasteners at the bottom and front. It is designed to be mounted on the two frames (the top tube and head tube) of a bicycle.

✚ Classification

4202.92-000

✚ Reason for classification

Accessories of cycles are prescribed in heading 87.14. Since the pouch described above can be used portably as a pouch when it is not mounted to a bicycle, it is not considered that the goods is solely or mainly used for bicycles.

Additionally, the pouch is covered more specifically in heading 42.02 (containers such as bags) than heading 87.14 (accessories of cycles).

Therefore, it is classified as stated above as other containers whose outer surfaces are made of textile according to the provisions of Note 3 to Section XVII, General Explanatory Note (III) (b) and (c) to Section XVII, heading 87.14 and heading 42.02.

**Note:**

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
