## Annex 2 referred to in Chapter 3 Product Specific Rules

## Section 1 General Notes

For the purposes of the product specific rules set out in this Annex:

- (a) the product specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
- (b) a requirement of a change in tariff classification or a specific manufacturing or processing operation applies only to nonoriginating materials;
- (c) reference to weight in this Annex means dry weight unless otherwise specified in the Harmonized System;
- (d) the following definitions apply:
  - (i) the term "section" means a section of the Harmonized System;

  - (iii) the term "heading" means the first four digits in the tariff classification number under the Harmonized System; and
    - (iv) the term "subheading" means the first six
       digits in the tariff classification number
       under the Harmonized System;
      - (v) the term "QVC 40" means that the good has a qualifying value content, calculated using the formula set out in paragraph 4 of Article 28, of not less than 40 per cent, and the final process of production has been performed in a Party;

- (vi) the term "CC" denotes a change to the chapter, heading or subheading from any other chapter. This means that all nonoriginating materials used in the production of the good have undergone a change in tariff classification at the two-digit level (i.e. a change in chapter) of the Harmonized System;
- (vii) the term "CTH" denotes a change to the chapter, heading or subheading from any other heading. This means that all nonoriginating materials used in the production of the good have undergone a change in tariff classification at the four-digit level (i.e. a change in heading) of the Harmonized System;
- (viii) the term "CTSH" denotes a change to the chapter, heading or subheading from any other subheading. This means that all nonoriginating materials used in the production of the good have undergone a change in tariff classification at the six-digit level (i.e. a change in subheading) of the Harmonized System; and
  - (ix) the term "WO" means that the good is wholly obtained or produced entirely in a Party as defined in paragraph 2 of Article 28;
- (e) this Annex is based on the Harmonized System as amended on 1 January 2017(hereinafter referred to in this Annex as "HS2017");
- (f) specific percentages referred to in Article 30, which relate to the total value or the total weight of non-originating materials used in the production of a good that do not undergo an applicable change in tariff classification, are as follows:
  - (i) in the case of a good provided for in chapters 19 through 24 of the Harmonized System, seven per cent in value of the good;
  - (ii) in the case of a good provided for in chapters 28 through 49 and 64 through 97 of the Harmonized System, 10 per cent in value of the good; and

- (iii) in the case of a good provided for in chapters 50 through 63 of the Harmonized System, 10 per cent by weight of the good; and
  - Note 1: The term "value of non-originating materials" means the value determined in accordance with paragraph 6 of Article 28.
  - Note 2: The term "value of the good" means the free-on-board value of the good referred to in subparagraph 4(b) of Article 28 or the value provided for in paragraph 5 of that Article.
- (g) a good which is covered by Attachment A or B of the Ministerial Declaration on Trade in Information Technology Products adopted in the Ministerial Conference of the World Trade Organization on 13 December 1996 and is used as a material in the production of another good in a Party may be considered as an originating material of the Party, regardless of the applicable product specific rule for the former good, provided that the former good is assembled in either Party, except where the former good is classified in subheadings 8541.10 through 8542.90.

Section VII	
Note: For the	ne purposes of chapters 39 and 40:
(a)	the term "chemical reaction" means a process,
	including a biochemical process, which results in a
	molecule with a new structure by breaking
	intramolecular bonds and by forming new
	intramolecular bonds, or by altering the spatial
	arrangement of atoms in a molecule, but does not
	include:
L	

(i) dissolving in water or other solvents; (ii) the elimination of solvents including solvents water; or (iii) the addition or elimination of water of crystallisation; the term "purification" means a process of reduction or elimination of impurities resulting (i) the elimination of not less than 80 per cent of the content of existing impurities; or a good directly suitable for one or more of the following applications: pharmaceutical, medical, cosmetic, (AA) veterinary or food grade substances; chemical products and reagents for (BB) analytical, diagnostic or laboratory use; elements and components for use in (CC) micro-electronics; (DD) specialised optical use; (EE) biotechnical use; (FF) carriers used in a separation process; (GG) nuclear grade use; (C) the term "isomer separation" means a process of isolation or separation of an isomer from a mixture of isomers; or (d) the term "biotechnological processes" means: (i) biological or biotechnological culturing, hybridisation or genetic modification of micro-organisms or cells of human, animal or plant; or

production, isolation or purification of cellular or intercellular structures.
