

## **Japan Customs Analysis Methods**

**No. 307**

### **Determination of Aromatic Constituents in Gasoline**

**(Issued in June 1999)  
(Updated in November 2013)**

#### **1. Scope**

This analysis method is applied for determining the proportion of aromatic constituents in petroleum products which are stipulated in headings 27.10 and 27.07 of Customs Tariff Law (Appendix Table - Customs Tariff Schedule) and whose end points of atmospheric distillation tested using JIS K 2254: 1998 method are not more than 220 °C.

#### **2. Procedure**

Refer to JIS K 2536-3: 2003.
