Infrared Spectra of Inorganic Compounds

Yoshiaki SEKIKAWA, *Masaru SHIMADA *

*Central Customs Laboratory, Ministry of Finance 531, Iwase, Maysudo-shi Chiba-Ken

This is a collection, to suit an analyst's convenience for qualitative work, of infrared spectra of inorganic compounds which are very common in every laboratory. Most of the chemicals for infrared measurements were products of Wako pure Chemical Industries Ltd and Junsei Chemicals Ltd, with a few which were imported. All spectra were obtained by Hitachi Grating Infrared Spectrophotometer Model EPI G2 by the preparation of KBr discs.
