

✚ **Brief description of goods**

Leather bag designed to be attached to the windshield of a motorcycle.

The bag is fixed on the rail of the windshield by using bolts and a metal mount on the back of the bag. The mouth of the bag is of a type that can be closed with a catch.

Size: 255 mm (W) x 135 mm (H) x 75 mm (D)

Application: Storage of personal belongings during touring

✚ **Classification**

4202.91-000

✚ **Reason for classification**

Parts and accessories of motorcycles are prescribed in heading 87.14. Since the windshield bag can be removed from the windshield easily and be used to bring goods in a similar way as a second bag, it is not considered that it is solely or mainly used for motorcycles and is not classified in heading 87.14 according to the provisions of Note 3 to Section VXII. Therefore, it is classified as stated above as a container whose outer surface is leather.

Note:

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
