

✚ **Brief description of goods**

Hanging hook, made of woven fabric of synthetic fiber, with a ring made of a base metal. It is used as a “hand strap” for carrying or hanging by attaching to a hand-held electric tool and the like.

✚ **Classification**

6307.90-029

✚ **Reason for classification**

Since the hanging hook is the composite good of woven fabric of synthetic fiber and base metal, the provisions of General Interpretative Rule 3 (b) are applied.

Since the part made of a base metal is just a part for attaching a tool etc. and it is considered that the fabric part (hand strap) for carrying and hanging of a tool etc. gives the essential character, it is classified as stated above.

**Note:**

The nature of the goods to be the basis for customs duty assessment depends on the conditions at the time of the import declaration of the goods with some specific exceptions (Article 4 of the Customs Law).

This classification example describes general replies based on the certain condition and do not necessarily represent all cases. Therefore, the classification decision on your actual importation may be different from that described here according to its condition.

If you wish to have a reply about the tariff classification and duty rate of specific goods that will be respected at the examination of import declaration, please ask Customs for Advance Ruling in writing.
