

# The Electronic Declaration Gate is now available at the Narita Airport Terminal 3.

It is scheduled to be also available at the Narita Airport Terminal 1 and 2 from next spring.

## Easy customs entry procedures with the app!

### Easy data input with smartphone

With the customs declaration application downloaded into smartphone, you may fill out your customs declaration form with inputting data in accordance with the guidance of the app. After completing the data, you may create your QR, and just put it on the electronic declaration terminal at the customs inspection area of the airport.

## Speedy clearance with the Electronic Declaration Gate

### Only your QR and passport are required

You may complete to submit your customs declaration form to Japan Customs when scanning your passport and QR created with the customs declaration application, at the terminal at the customs inspection area of the airport. Your face photo is taken during operation at the electronic declaration terminal, and it is used for facial recognition when you walk through the Gate.

### Walking through the Electronic Declaration Gate with facial recognition

After completing the procedures on the electronic declaration terminal, you may walk through the Electronic Declaration Gate smoothly.

- ※ The photo for facial recognition will be deleted immediately after you walk through the Gate.
- ※ You may happen to receive questions or baggage inspection.

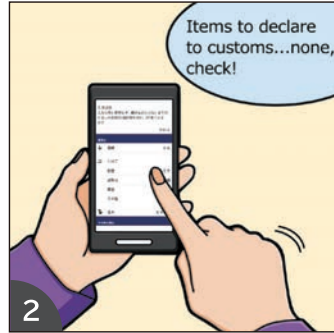

This service is entirely brand new. Please ask customs officers for any question at the airport.

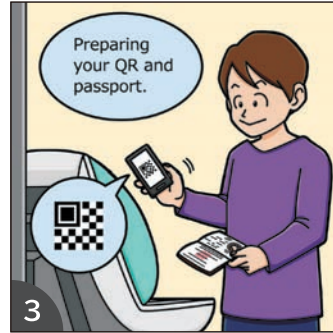

# How to use the Electronic Declaration Gate

With downloading the customs declaration application in advance, you may complete customs entry procedures smoothly.

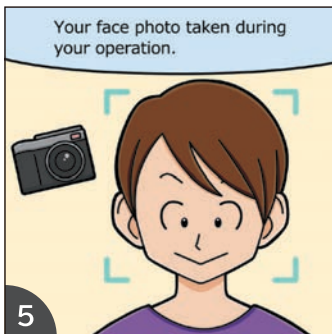

With inputting the data according to the guidance of the app, you may create your QR.

With preparing your QR and passport, you may go to the electronic declaration terminal at the customs inspection area of the airport.

You may just put your QR and the photo page of your passport on the respective readers of the electronic declaration terminal.

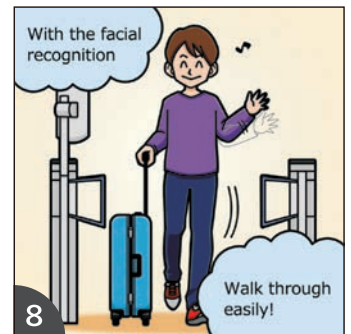

While operating at the terminal, your face photo is taken with the cameras attached to the Terminal.

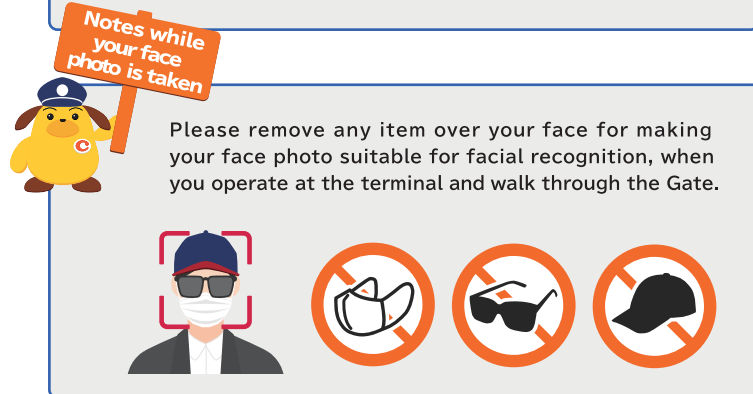

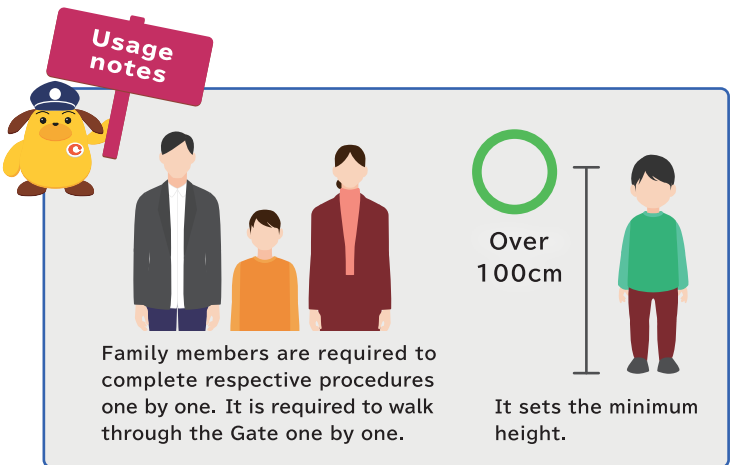

It allows you to complete your customs entry procedures before picking up check-in baggage. Therefore, you are recommended to complete the procedures during the waiting time of baggage claim.

After picking up check-in baggage, you may walk to the Gate without waiting.

With the facial recognition, you may walk through the Gate smoothly.

- You may happen to receive questions or baggage inspection.
- After you complete your procedures at the terminal, you may be guided to proceed to the customs counter next to the Gate in the cases of the declaration beyond the duty-free allowance, the declaration of unaccompanied articles, etc.
