| Outline                | After checking all the materials, it was found out that the materials that were classified in Chapter 7 included non-originating ones that account for 70% of the whole materials on a weight basis. Those non-originating materials are not wholly obtained in the EU, thus they do not satisfy the product specific rule. Furthermore, the certifier did not have information of the value of the non-originating materials; thus Article 3.6, "Tolerances," cannot be applied to the product. Therefore, the product is not considered an originating good of the EU. |  |  |

### Requirements to satisfy PSR

Materials of (Chapter 7) are required to be wholly obtained in the EU.

### Requirements to apply Article 3.6 (Tolerances)

Total value of all the non-originating materials that do not satisfy the product specific rules does not exceed 10% of the ex-works or free on board price of the product.
