

Product	Bakers' wares	HS code	HS 19.05 (HS2002)
EPA/GSP	Japan-Indonesia EPA	Origin Criteria (as indicated on Proof of Origin)	C (The good satisfies product specific rules)
Product Specific Rules	A change to heading 19.05 from any other chapter, except from Chapter 10 or 11.		
Outline	After checking all the materials, it was found out that the wheat flour (HS 11.01) used for the product was a non-originating material. That is because it was manufactured in Indonesia from wheat (HS Chapter 10) harvested in a third country and it does not satisfy the product specific rule of HS 11.01, which is "A change to subheading 1101.00 through 1102.10 from any other chapter, except from chapter 10." Thus, the product, bakers' wares, does not satisfy the product specific rule of HS 19.05 and is not considered an originating good of Indonesia under the Japan-Indonesia EPA.		

#### Requirements to satisfy PSR

Materials that are classified in HS Chapters 10 or 11 are required to be originating materials.
