Outline	After checking the manufacturing process, it was found that the product was wine produced in a third country that was classified in HS 22.04, transported to the EU, and bottled after the addition of antioxidants. As for the non-originating materials in HS 22.04, they do not meet the product specific rules of HS 22.04 because “CTH” has not been satisfied. Therefore, the product is not considered an originating good of the EU under the Japan-EU EPA.
